Application/Control Number: 10/764,255

Art Unit: 3764

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newton Jr.

Newton Jr. discloses a device/starting block comprising: a rail, a pair of foot assemblies, each foot assembly comprising a foot pad having a width of <u>about 5</u> inches and markings (50)

The examiner considers the width of <u>about</u> 5 inches as a standard width in the art and as an obvious selection in width of starting pedals given the width of a standard foot and shoe.

In regard to claim 3 as broadly claimed and given that applicant has claimed no specific unit; any unit at which these markings are spaced can be considered as standard.

In regard to claim 4 note that the markings are indented into the surface of the pads. The examiner further note that to mold the pad of Newton Jr. is a known method of manufacture and an obvious process known in the art of producing components in the art.

Art Unit: 3764

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the overall device of Hanna which include measuring indicia.

Note the device of Rein which includes width adjustments. .

Any inquiry concerning this communication should be directed to Jerome Donnelly at telephone number (571) 272-4975.
